

Go online while you wait.

When you visit the OB/GYN Group of Austin, you are welcome to use our wireless network at your convenience. The network is easily accessed by directing your laptop or wireless device to **obgyn_lobby** and selecting the connect feature of your device. There is no password, passkey, user name, or IP address required for access. It's that easy. Connect and you can work, browse the internet, or check your email freely and easily.

NOTE: Remember, our lobby is an open area and what you are viewing on your laptop/device could be seen by those around you. We strongly recommend that you do not post private data (bank information, credit card numbers, etc.) or anything you need to keep secure on this network.
