The OB/GYN Group of Austin

Dr. David W. Reue, Obstetrician and Gynecologist with The OB/GYN Group of Austin, is a recipient of the Patients' Choice Award.

Austin – January 26, 2010 – Each month, more than 40,000 patients across the U.S. provide feedback about their experiences with their physicians. Each year, hundreds of thousands of patient reviews are tabulated by MDx Medical, Inc. Based on these reviews, a small number of physicians are selected to be the nation's most preferred physicians. In November of 2009, OB/GYN Group of Austin's Dr. David W. Reue was selected to receive the Patients' Choice Award, receiving exceptionally high praise from his patients. Less than 5% of the nation's 720,000 active physicians receive this honor.

Dr. Reue's patients specifically complimented him in areas such as bedside manner, the amount of time he spends with them, their overall impressions of him as a physician, appropriate follow-up and the courtesy of the OB/GYN Group of Austin staff.

Dr. Reue commented, "What an honor to receive such kind recognition from my patients. My life's vocation is to provide state-of-the-art and compassionate medical care to all my patients. I also believe that communication is essential to a successful patient-physician relationship, so I encourage my patients to ask questions and become actively involved in their care."

About David W. Reue, MD

Dr. David W. Reue is board certified by the American Board of Obstetrics and Gynecology and has been with the OB/GYN Group of Austin since the early 1990's. He received his Bachelor of Science Degree from Texas A&M University and received his medical degree from The University of Texas Medical School at San Antonio. Dr. Reue completed his residency in Obstetrics and Gynecology and was Chief Resident at St. Paul Medical Center in Dallas. He is a Fellow of the American College of Obstetrics and Gynecology, as well as a member of the Society of Laparoscopic Surgeons, the American Medical Association, the Texas Medical Association and the Travis County Medical Society.
